## W3000HG

3000 PSI/206 bar 8,5 LPM

With Waspper pressure washer W3000HG cleaning is easy and fun. With a maximum pressure of 3000 PSI/206 bar and 8.5 LPM flow rate this pressure washer can be used for variety of applications around the house, weekend home and garage. With the standard features such as a 7.5 m high pressure hose, ergonomic gun and a small, light construction for easy storage is ideal for jobs where small spaces, transport and storage is an obstacle for the use of your machine. The high pressure and great flow is created by a full aluminum axial pump with which the main advantage is a much greater lifespan compared to the pumps of electric pressure washers in its class. This pressure washer also features 15° washing nozzle. The machine is powered by a great quality Peggas gasoline engine and with all the maintenance performed on time will provide years of trouble-free operation.
